SKILLS:

Skills Coding: Python, C++, JavaScript, HTML, CSS, MySQL, ReactJS, React Native, Git, Nodejs, PHP, MongoDB, Google Firebase.

Other technical skills: Adobe Photoshop, Adobe premiere pro, short films, Graphic Design

Languages: Hindi (Native/Mother Language), English (Advanced/2nd language), French (Working Knowledge)

PROJECT:

Foodini App: After getting selected for a startup program, we came up with an idea of creating a **food delivery app** provided knowledge about cultural dishes and focuses primarily on dishes rather than the restaurant as a whole. It was created using **React Native** for the frontend, and google firebase services such as **firestore, database** and **firebase functions** for our backend.

Personal Portfolio/Website: used **React Frame (React), Nodejs, yarn, HTML5, CSS3** and UI components like Material UI to build personal portfolio and **netlify** for hosting & deploying the website. Link: amitkumarwebsite.com

Notes App: By using **React Native**, created a notes app in which you can keep track of your day to day TO DO list.

Food APP: Python GUI based on **Tkinter**, OS module and pillow libraries, created a food ordering app along login page and payment methods.
